Plant Science, 84 (1992) 233–235
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 84 (1992)

N-Acetyl-β-D-glucosaminidase, latex, *Hevea brasiliensis*, 25
Allium, *Pisum*, *Glomus*, chitinase, chitosinase, β-1,3-glucanase, isoforms, 17
Antifungal hydrolase, pathogenesis-related proteins, *Nicotiana tabacum*, blue mold, 1
Arachidonic acid, *Solanum tuberosum*, peroxidase, polyphenol-oxidase, hypersensitive cell death, 91
Aspirin (*o*-acetyl-salicylic acid), benzyladenine, *Cucumis melo* L., proline, salicylic acid, shoot organogenesis, thioproline, 193

Barley grain and barley leaves, chitinases, polyamines, rape leaves, chromium ions, oxidative stress, 119
Benzyladenine, aspirin (*o*-acetyl-salicylic acid), *Cucumis melo* L., proline, salicylic acid, shoot organogenesis, thioproline, 193
Blue mold antifungal hydrolase, pathogenesis-related proteins, *Nicotiana tabacum*, 1
Brassica napus, tapetum and microspore-specific, nucleotide sequence, in situ hybridisation, 187
Brassica napus L., abscisic acid, very long-chain fatty acid biosynthesis, oil body proteins, microspore-derived embryos, 99

Callus, grapevine, micropropagation, free radical, Schiff's bases, catalase, superoxide dismutase, 83
CAM *Kalanchöe lateritia*, nitrate reductase, nitrite reductase, glutamine synthetase, glutamate synthase, glutamate dehydrogenase, 145
Cancer, taxol, Pacific yew, elicitors, precursors, microbes, [^{14}C]taxol, 65
Capsicum annuum L., chili pepper, hypocotyl cultures, plant regeneration, shoot production, 215
Catalase, grapevine, micropropagation, callus, free radical, Schiff's bases, superoxide dismutase, 83
Cell dedifferentiation, cell suspension culture, steroidal glycosides formation, sterols, *Yucca gloriosa* L., 201
Cell suspension culture, cell dedifferentiation, steroidal glycosides formation, sterols, *Yucca gloriosa* L., 201
Cell walls, cultured carrot cells, β-1,3-glucanase, pectin, wall-bound enzyme, 75
Cercospora beticola toxin, *Zea mays*, *Spinacia oleracea*, proton transport, microsomal vesicles, fusicoccin, 53
Chemical treatment, peptidyl-prolyl *cis-trans* isomerase, wounding, salt stress, heat shock, 171
Chili pepper, *Capsicum annuum* L., hypocotyl cultures, plant regeneration, shoot production, 215
Chitinase, *Allium*, *Pisum*, *Glomus*, chitosinase, β-1,3-glucanase, isoforms, 17
Chitinases, polyamines, barley grain and barley leaves, rape leaves, chromium ions, oxidative stress, 119
Chitosinase, *Allium*, *Pisum*, *Glomus*, chitinase, β-1,3-glucanase, isoforms, 17
Chromium ions, chitinases, polyamines, barley grain and barley leaves, rape leaves, oxidative stress, 119
Citrofortunella mitis, sesquiterpene, selinene cyclase, DEAE Sephacel purification, farnesyl diphosphate, 129
Cotyledons tea, somatic embryogenesis, regeneration, 209
Cucumis melo L., aspirin (*o*-acetyl-salicylic acid), benzyladenine, proline, salicylic acid, shoot organogenesis, thioproline, 193
Cultured carrot cells, cell walls, β-1,3-glucanase, pectin, wall-bound enzyme, 75
Cyanobacteria, NADP$^+$-dependent glyceraldehyde-3-phosphate dehydrogenases, enzyme distribution, eukaryotic microalgae, higher plants, 163

DEAE Sephacel purification, *Citrofortunella mitis*, sesquiterpene, selinene cyclase, farnesyl diphosphate, 129
DNA transfer nuclease, electroporation, pollen, 11

Electroporation, nuclease, pollen, DNA transfer, 11
Elicitors, taxol, cancer, Pacific yew, precursors, microbes, [^{14}C]taxol, 65
Enzyme distribution, NADP$^+$-dependent glyceraldehyde-3-phosphate dehydrogenases, cyanobacteria, eukaryotic microalgae, higher plants, 163
Eukaryotic microalgae, NADP$^+$-dependent glyceraldehyde-3-phosphate dehydrogenases, enzyme distribution, cyanobacteria, higher plants, 163

Farnesyl diphosphate *Citrofortunella mitis*, sesquiterpene, selinene cyclase, DEAE Sephacel purification, 129
Free radical, grapevine, micropropagation, callus, Schiff's bases, catalase, superoxide dismutase, 83
Fruit ripening, *Mangifera indica*, sucrose metabolism, sucrose phosphate synthase, sucrose synthase, invertase (acid and neutral), 45
Fusicoccin, *Zea mays*, *Spinacia oleracea*, proton transport, microsomal vesicles, *Cercospora beticola* toxin, 53

Galactosyltransferase, glucosyltransferase, glycoalkaloids, potato, *Solanum tuberosum*, solanidine, sterol glucosyltransferase, 35
Genomic organization, introns, maize, multigene family, polymer chain reaction, tubulins, 179

Glomus, *Allium*, *Pisum*, chitinase, chitosinase, β-1,3-glucanase, isoforms, 17
β-1,3-Glucanase, *Allium*, *Pisum*, *Glomus*, chitinase, chitosinase, isoforms, 17
β-1,3-Glucanase, cell walls, cultured carrot cells, pectin, wall-bound enzyme, 75
Glucosyltransferase, galactosyltransferase, glycoalkaloids, potato, *Solanum tuberosum*, solanidine, sterol glucosyltransferase, 35
Glutamate dehydrogenase, nitrate reductase, nitrite reductase, glutamine synthetase, glutamate synthase, CAM *Kalanchöe lateritia*, 145
Glutamate synthase, nitrate reductase, nitrite reductase, glutamine synthetase, glutamate dehydrogenase, CAM *Kalanchöe lateritia*, 145
Glutamine synthetase, nitrate reductase, nitrite reductase, glutamate synthase, glutamate dehydrogenase, CAM *Kalanchöe lateritia*, 145
Glycoalkaloids, galactosyltransferase, glucosyltransferase, potato, *Solanum tuberosum*, solanidine, sterol glucosyltransferase, 35
Grapevine, micropropagation, callus, free radical, Schiff's bases, catalase, superoxide dismutase, 83

Heat shock peptidyl-prolyl *cis-trans* isomerase, wounding, salt stress, chemical treatment, 171
Hevea brasiliensis, latex, *N*-acetyl-β-D-glucosaminidase, 25
Higher plants NADP$^+$-dependent glyceraldehyde-3-phosphate dehydrogenases, enzyme distribution, cyanobacteria, eukaryotic microalgae, 163
Hypersensitive cell death, *Solanum tuberosum*, peroxidase, polyphenoloxidase, arachidonic acid, 91
Hypocotyl cultures, *Capsicum annuum* L., chili pepper, plant regeneration, shoot production, 215

In situ hybridisation, *Brassica napus*, tapetum and microspore-specific, nucleotide sequence, 187
In vitro transcription, viroid, PSTVd replication, nuclei, transcription inhibitors, 221
Introns, genomic organization, maize, multigene family, polymer chain reaction, tubulins, 179
Invertase (acid and neutral) *Mangifera indica*, fruit ripening, sucrose metabolism, sucrose phosphate synthase, sucrose synthase, 45
Invertase, strawberry (*Fragaria* × *ananassa* Duch.), soluble sugars, wall-bound enzymes, 59
Isoforms, *Allium*, *Pisum*, *Glomus*, chitinase, chitosinase, β-1,3-glucanase, 17

Latex, *N*-acetyl-β-D-glucosaminidase, *Hevea brasiliensis*, 25

Maize, genomic organization, introns, multigene family, polymer hain reaction, tubulins, 179
Mangifera indica, fruit ripening, sucrose metabolism, sucrose phosphate synthase, sucrose synthase, invertase (acid and neutral), 45
Microbes, taxol, cancer, Pacific yew, elicitors, precursors, [^{14}C]taxol, 65
Micropropagation, grapevine, callus, free radical, Schiff's bases, catalase, superoxide dismutase, 83
Microsomal preparation, phospholipase, phosphatidylcholine, oxidized lipid, peroxidized lipid, ricinoleate, 137
Microsomal vesicles, *Zea mays*, *Spinacia oleracea*, proton transport, *Cercospora beticola* toxin, fusicoccin, 53
Microspore-derived embryos, abscisic acid, very long-chain fatty acid biosynthesis, oil body proteins, *Brassica napus* L., 99
Multigene family, genomic organization, introns, maize, polymer chain reaction, tubulins, 179

NADP$^+$-dependent glyceraldehyde-3-phosphate dehydrogenases, enzyme distribution, cyanobacteria, eukaryotic microalgae, higher plants, 163
Nicotiana tabacum, antifungal hydrolase, pathogenesis-related proteins, blue mold, 1
Nitrate reductase, nitrite reductase, glutamine synthetase, glutamate synthase, glutamate dehydrogenase, CAM *Kalanchöe lateritia*, 145
Nitrite reductase, nitrate reductase, glutamine synthetase, glutamate synthase, glutamate dehydrogenase, CAM *Kalanchöe lateritia*, 145
Nuclease, electroporation, pollen, DNA transfer, 11
Nuclei, viroid, PSTVd replication, in vitro transcription, transcription inhibitors, 221
Nucleotide sequence, *Brassica napus*, tapetum and microspore-specific, in situ hybridisation, 187

Oil body proteins, abscisic acid, very long-chain fatty acid biosynthesis, *Brassica napus* L., microspore-derived embryos, 99
Oxidative stress chitinases, polyamines, barley grain and barley leaves, rape leaves, chromium ions, 119
Oxidized lipid, phospholipase, microsomal preparation, phosphatidylcholine, peroxidized lipid, ricinoleate, 137

Pacific yew, taxol, cancer, elicitors, precursors, microbes, [^{14}C]taxol, 65
Papaver somniferum, phosphatase, phosphoprotein phosphatase, 153
Pathogenesis-related proteins, antifungal hydrolase, *Nicotiana tabacum*, blue mold, 1
Pectin, cell walls, cultured carrot cells, β-1,3-glucanase, wall-bound enzyme, 75
Peptidyl-prolyl *cis-trans* isomerase, wounding, salt stress, chemical treatment, heat shock, 171
Peroxidase, *Solanum tuberosum*, polyphenoloxidase, arachidonic acid, hypersensitive cell death, 91
Peroxidized lipid, phospholipase, microsomal preparation, phosphatidylcholine, oxidized lipid, ricinoleate, 137
Phosphatase, *Papaver somniferum*, phosphoprotein phosphatase, 153
Phosphatidylcholine, phospholipase, microsomal preparation, oxidized lipid, peroxidized lipid, ricinoleate, 137
Phospholipase, microsomal preparation, phosphatidylcholine, oxidized lipid, peroxidized lipid, ricinoleate, 137
Phosphoprotein phosphatase, *Papaver somniferum*, phosphatase, 153
Pisum, *Allium*, *Glomus*, chitinase, chitosinase, β-1,3-glucanase, isoforms, 17

Plant regeneration, *Capsicum annuum* L., chili pepper, hypocotyl cultures, shoot production, 215
Pollen, nuclease, electroporation, DNA transfer, 11
Polyamines, chitinases, barley grain and barley leaves, rape leaves, chromium ions, oxidative stress, 119
Polymer chain reaction, genomic organization, introns, maize, multigene family, tubulins, 179
Polyphenoloxidase, *Solanum tuberosum*, peroxidase, arachidonic acid, hypersensitive cell death, 91
Potato, galactosyltransferase, glucosyltransferase, glycoalkaloids, *Solanum tuberosum*, solanidine, sterol glucosyltransferase, 35
Precursors, taxol, cancer, Pacific yew, elicitors, microbes, [^{14}C]taxol, 65
Proline, aspirin (*o*-acetyl-salicylic acid), benzyladenine, *Cucumis melo* L., salicylic acid, shoot organogenesis, thioproline, 193
Proton transport, *Zea mays*, *Spinacia oleracea*, microsomal vesicles, *Cercospora beticola* toxin, fusicoccin, 53
PSTVd replication, viroid, nuclei, in vitro transcription, transcription inhibitors, 221

Rape leaves, chitinases, polyamines, barley grain and barley leaves, chromium ions, oxidative stress, 119
Regeneration, tea, somatic embryogenesis, cotyledons, 209
Ricinoleate phospholipase, microsomal preparation, phosphatidylcholine, oxidized lipid, peroxidized lipid, 137

Salicylic acid, aspirin (*o*-acetyl-salicylic acid), benzyladenine, *Cucumis melo* L., proline, shoot organogenesis, thioproline, 193
Salt stress, peptidyl-prolyl *cis-trans* isomerase, wounding, chemical treatment, heat shock, 171
Schiff's bases, grapevine, micropropagation, callus, free radical, catalase, superoxide dismutase, 83
Selinene cyclase, *Citrofortunella mitis*, sesquiterpene, DEAE Sephacel purification, farnesyl diphosphate, 129
Sesquiterpene, *Citrofortunella mitis*, selinene cyclase, DEAE Sephacel purification, farnesyl diphosphate, 129
Shoot organogenesis, aspirin (*o*-acetyl-salicylic acid), benzyladenine, *Cucumis melo* L., proline, salicylic acid, thioproline, 193
Shoot production *Capsicum annuum* L., chili pepper, hypocotyl cultures, plant regeneration, 215
Solanidine, galactosyltransferase, glucosyltransferase, glycoalkaloids, potato, *Solanum tuberosum*, sterol glucosyltransferase, 35
Solanum tuberosum, galactosyltransferase, glucosyltransferase, glycoalkaloids, potato, solanidine, sterol glucosyltransferase, 35
Solanum tuberosum, peroxidase, polyphenoloxidase, arachidonic acid, hypersensitive cell death, 91
Soluble sugars, strawberry (*Fragaria* × *ananassa* Duch.), invertase, wall-bound enzymes, 59
Somatic embryogenesis, tea, regeneration, cotyledons, 209
Spinacia oleracea, *Zea mays*, proton transport, microsomal vesicles, *Cercospora beticola* toxin, fusicoccin, 53
Steroidal glycosides formation, cell suspension culture, cell dedifferentiation, sterols, *Yucca gloriosa* L., 201
Sterol glucosyltransferase, galactosyltransferase, glucosyltransferase, glycoalkaloids, potato, *Solanum tuberosum*, solanidine, 35
Sterols, cell suspension culture, cell dedifferentiation, steroidal glycosides formation, *Yucca gloriosa* L., 201
Strawberry (*Fragaria* × *ananassa* Duch.), soluble sugars, invertase, wall-bound enzymes, 59
Sucrose metabolism, *Mangifera indica*, fruit ripening, sucrose phosphate synthase, sucrose synthase, invertase (acid and neutral), 45
Sucrose phosphate synthase, *Mangifera indica*, fruit ripening, sucrose metabolism, sucrose synthase, invertase (acid and neutral), 45
Sucrose synthase, *Mangifera indica*, fruit ripening, sucrose metabolism, sucrose phosphate synthase, invertase (acid and neutral), 45
Superoxide dismutase, grapevine, micropropagation, callus, free radical, Schiff's bases, catalase, 83

Tapetum and microspore-specific, *Brassica napus*, nucleotide sequence, in situ hybridisation, 187
Taxol, cancer, Pacific yew, elicitors, precursors, microbes, [^{14}C]taxol, 65
[^{14}C]Taxol, taxol, cancer, Pacific yew, elicitors, precursors, microbes, 65
Tea, somatic embryogenesis, regeneration, cotyledons, 209
Thioproline, aspirin (*o*-acetyl-salicylic acid), benzyladenine, *Cucumis melo* L., proline, salicylic acid, shoot organogenesis, 193
Transcription inhibitors, viroid, PSTVd replication, nuclei, in vitro transcription, 221
Tubulins, genomic organization, introns, maize, multigene family, polymer chain reaction, 179

Very long-chain fatty acid biosynthesis, abscisic acid, oil body proteins, *Brassica napus* L., microspore-derived embryos, 99
Viroid, PSTVd replication, nuclei, in vitro transcription, transcription inhibitors, 221

Wall-bound enzyme, cell walls, cultured carrot cells, β-1,3-glucanase, pectin, 75
Wall-bound enzymes, strawberry (*Fragaria* × *ananassa* Duch.), soluble sugars, invertase, 59
Wounding, peptidyl-prolyl *cis-trans* isomerase, salt stress, chemical treatment, heat shock, 171

Yucca gloriosa L., cell suspension culture, cell dedifferentiation, steroidal glycosides formation, sterols, 201

Zea mays, *Spinacia oleracea*, proton transport, microsomal vesicles, *Cercospora beticola* toxin, fusicoccin, 53
